Release of annual report; cash-adjusted PER of 6.2 for 2010e

Vtion yesterday published the annual report for FY 2009. The preliminary figures were already released.

Vtion was able to raise sales by 73% to EUR 67.6m. The high sales growth was primarily driven by the introduction of the 3-G networks in China, which caused a boom for wireless data cars.

The high sales growth was generated despite a substantial decline of the average price by 35% to EUR 39 as the sale of wireless data cars rose by 172% to 1.65m.

The EBIT developed disproportionately low to sales owing to a markedly grown cost of material ratio of +50% (EUR 23m). This growth can primarily be put down to the decline of the average price for wireless data cars.

Vtion has a comfortable cash pile as well as a high equity ratio: Despite the build-up of working capital on account of the strong sales growth the net cash was EUR 61.5m or EUR 3.80 per share at the end of 2009. The cash has a share of 54% in the balance sheet total. The equity ratio stood at 87% at year-end.

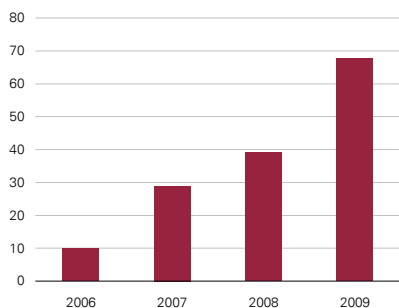

Growth in 2010 will be driven by a continued strong growth of the number of 3G users. At the end of 2009, only 15m participants were using the 3G networks. The overall number of mobile phone users in China was 747m at the end of the year (penetration: 58%). The rising internet penetration looks set to be another growth driver. In 2009, the number of internet users was up by 29% to 384m (penetration: 28%).

The DCF-based PT of EUR 12.50 remains unchanged; the share is rated as Buy. The attractive valuation is supported by a 2010e EV/EBITDA multiple of 4.4 and a cash-adjusted PER of 6.2.

Company background

Vtion develops and markets wireless data card solutions for PCs and laptops for all established interface standards as well as for all wireless standards which are in operation in China. Vtion is one of the top three suppliers in China with a market share of ~25%. Wireless data cards are connected to a PC or a laptop via interfaces such as USB or PCI to establish a mobile internet access.

The market for data cards currently has oligopolistic structures. The three main mobile operators (China Mobile, China Unicom and China Telecom) procure 80% of the quantity of the three main suppliers (ZTE, Huawei and Vtion). This starting situation, which is excellent for Vtion, should remain stable until 2011e due to the required high quality standards, certification processes, the comprehensive contractual relationships and collaborations.

Competitive quality

- **Outsourced production:** Vtion has no own production capacities and focuses on product design, marketing and customer care. Thus, the company is highly flexible and can rapidly adapt itself to a change in demand.
- **Licencings with all three network operators:** Vtion is qualified as top-tier supplier among the three network operators and thus stands out compared to the majority of competitors. The network operators currently procure 80% of the required wireless data cards from 3 suppliers.
